FENCING SYSTEMS

**prices from**  
900mm **\$160** per lineal metre  
1.2m **\$200** per lineal metre  
1.8m **\$300** per lineal metre

## Stunning designs

A unique and solid fencing system that adds a beautiful finishing touch to your property.

## Quick & easy install

Arrives fully finished and ready to paint, requiring only a quick and easy installation in a few days.

## Rock bottom prices

Fits any budget being much less than the price of a comparable plastered block wall.

We show our most popular styles in this catalogue. Visit our website [panelrok.co.nz](http://panelrok.co.nz) or our Facebook page to see hundreds of other styles and choices!

# Panelrok® benefits...

## Simply stunning street appeal

There are lots of properties in New Zealand that lack 'kerb' appeal... too many potentially charming properties with ugly-duckling fences on their street frontage.

They don't have to... a Panelrok® Solid Fencing System will add that beautiful finishing touch to your property in just a few days. Great design styles are easily suited to your architecture.

A Panelrok® fence will enhance the value of your total property whether for rental return, resale value or equity.

## Easy to design & order

We show our most popular styles in this catalogue. Visit our website [panelrok.co.nz](http://panelrok.co.nz) or our Facebook page and to see hundreds of other styles and choices! Most items are held in stock enabling immediate delivery and installation. Installed in just a few days, Panelrok® minimises the mess, disruption and costs of on-site construction and finishing work.

## Rock bottom pricing

Save around 70% comparable to a similar plastered block wall. A price guide for each style is contained on pages 6 and 7.

## Ultra low maintenance

Panels are easily painted with standard Acrylic House Paints. No surface cracks. No alkaline bleeding. Any damage can be easily repaired and repainted with standard fillers and/or a Panelrok® Patch-up kit.

## Light weight modular system

There are three basic components:

- **Solid Panels** – 100mm thick and available in selected heights and widths
- **Channels** – with 100mm slots to take the Solid Panels
- **Pillars** that can optionally clip on to the Channels

Lightweight but strong Panelrok® panels are available primed with the patented Panelrok® coating. They only require quick and easy installation, then you can apply your final paint colour.

## Built to last

Super strong, composite panel technology provides a durable, yet lightweight wall that will continue to look great year after year. The unique Panelrok® design process means no cracks.

## Quick & easy install

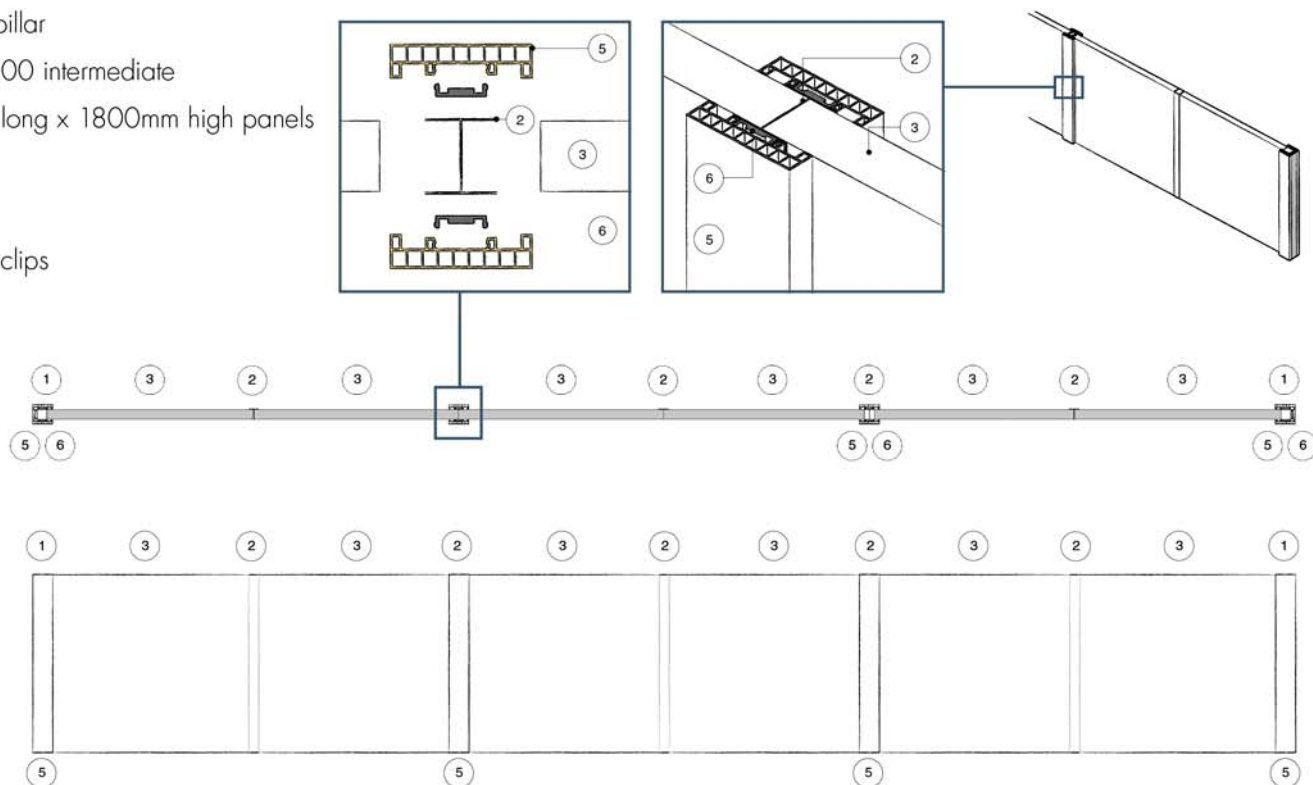

Arrives fully finished and ready to paint, requiring only a quick and easy installation in a few days.

## Note:

*Panelrok® fence panels are not designed to be used as a retaining wall, and do not have the structural strength to hold soil. Panelrok® fences can be installed in slopping sections, and with the lego like installation will suit most if not all sections. Panelrok® Fences need installation by a Builder or Fencing Pro to ensure perfection, straightness and years of low maintenance. Fences should be installed in accordance with the Panelrok® Specification Guide and where appropriate in accordance with engineers and council specification.*

# 3 Easy Steps...

- 1 End 100 pillar
- 2 H beam 100 intermediate
- 3 2000mm long x 1800mm high panels
- 4 L brackets
- 5 Pillar front
- 6 Pillar front clips

## Step 1 channel posts

After set-out, Panelrok® Posts are concreted into the ground. Posts feature 100mm channels which enable the insert of Panelrok® 100mm Panels and other inserts.

There are four standard posts:

- **Ends**
- **Corners**
- **Intermediates**
- **Flat Pillars**

The posts are available in lengths of 2.0m, 2.4m and 2.8m.

## Step 2 panels

Lightweight and Super Strong Panelrok® Panels are available in standard Heights of 0.9, 1.2 and 1.8 Metres. Standard lengths are available in 1.5, 1.6, 1.7, 1.8, 1.9 and 2.0 Metres. Special sizes are available, and you can trim Panelrok® Panels using a hand saw.

**Design Tip:** Choose Panel lengths that best enable even spacing between pillars or pairs of pillars over the length of your property.

We show our most popular styles in this catalogue. Visit our website [panelrok.co.nz](http://panelrok.co.nz) or our Facebook page to see hundreds of other styles and choices!

[www.facebook.com/panelrok](https://www.facebook.com/panelrok)

## Step 3 pillar fronts and hats (REFER FULL INSTALLATION GUIDE)

Panelrok® Pillar fronts may be installed onto the galvanised posts as an option to give the solid masonry pillar finish.

**Then paint, add gates and insert screens.**

## Panelrok Planters

Panelrok® Planters have the masonry finish but weigh only 10% of the weight of Masonry planters. They are constructed of either Fibreglass or other Resins, so do not discolour with moisture as do sandstone and other pots. Sizes vary.

## Panelrok Decorative Coatings

Panelrok® is not just limited to fence panels. The Panelrok® system can be applied to most surfaces to give the Panelrok® look, and durability. Whether it is added to an existing pot or planter, or even to Plywood as an exterior cladding. We can Panelrok plywood, fibreboard or just about any surface.

The Panelrok® coating can be applied to round surfaces, which normally can not be done by normal rendering.

The Panelrok® coating is a perfect finish to any area, and can be applied to most surfaces.

The Panelrok® system can be applied to most building material surfaces (on site or in our factory) to give the Panelrok look, and durability. Interior or exterior.

- Plywood
- Fibre Cement Board
- Aluminium / Steel
- Plastics
- ... just about any surface.

**Enquiries welcome.**

## Knotwood Gates

Knotwood gates have the look of timber gates, but are made from Aluminium. So they will not warp or need painting.

Up to 21 Timber finishes available.

Pictured: Western Red Cedar

**from**  
**\$550** ex GST  
per square metre

## Knotwood Screen

Knotwood screens, using the Knotwood system, can be added to any fence system as a decorative and long lasting. Screen are not just for fences, you can also use for privacy, or where you would use trellis or lattice. The huge advantage of the Knotwood screen is that it will not crack, warp and is maintenance free. You can have the hardwood look, that will last. All Knotwood coatings carry a 10 year warranty against the film and colour integrity.

**from**  
**\$300** ex GST  
per square metre

# Other Panelrok® Products

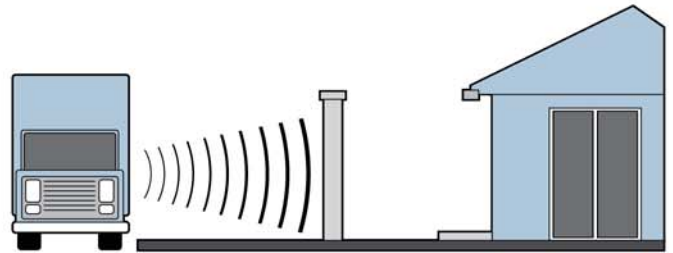

## Clip on Pillars

The perfect finish to any fence system, whether that be Panelrok®, a fibre board fence, a timber fence. This gives the smart pillar look easily, and inexpensively. These clip on pillars, can be painted, can be panelroked, or use your own texture to match your décor.

## Acoustic Panels Noise reducing

The Panelrok® acoustic panels are perfect if you require a fence solution to keep noise out or in. The manufactured panels use raw materials which absorb noise, so the bounce from the panels is also limited.
